

MEHER ARAVIND PASUPULETI

Hyderabad • 1706301meheraravind@gmail.com • 7396268728

Professional Summary

Detail-oriented MCA student with expertise in **machine learning, programming, and problem-solving**. Eager to contribute **enthusiasm, adaptability, and a fresh perspective** to a dynamic team.

Education

Prathibha Degree College

BSc (Computer Science , Mathematics , Statistics)

8.31 CGPA

2021 – 2024

Chaitanya Bharathi Institute Of Technology

MCA

7.44 CGPA

2024 – 2026

Certifications/Courses

Introduction to Technology Apprenticeship Job Simulation

Forage || Accenture

- Engaged as a technology apprentice, exploring innovative applications of technology across industries in collaboration with a senior counterpart.
- Applied problem-solving skills to a client case study by identifying shortcomings in existing processes and advocating for cloud computing as the optimal solution.
- Presented a compelling slide deck to senior management, applied cutting-edge technologies, and strengthened skills through interactive learning and client-focused exercises.

Excel Skills Job Simulation

Forage || JP Morgan Chase

- **Excel Expertise:** Proficient in shortcuts, formulas, and conditional formatting for optimized data analysis.
- **Automation & Visualization:** Skilled in VBA macros and dynamic dashboards to enhance efficiency and insights.
- **Data Storytelling:** Strong ability to interpret and communicate complex data for impactful decision-making.

Cyber Security Unlocked Workshop

Chaitanya Bharathi Institute Of Technology

- Fundamentals of SQL injection
- Fundamentals of XSS
- CSRF & SSRF

Course Project:

House Price Predictor (California Housing Dataset)

Developed a machine learning model to predict house prices using the California Housing dataset. Performed data preprocessing, including handling missing values, feature engineering, and one-hot encoding categorical variables. Conducted exploratory data analysis (EDA) with correlation heatmaps, histograms, and scatter plots to identify key patterns.

Python Code Debugger Assistant (Using Open Ai Api)

Developed a web-based assistant that helps users identify and fix bugs in their code snippets. The tool allows users to input code and receive real-time debugging assistance powered by OpenAI's language model. Built a Flask backend for processing requests and integrated a React.js frontend for a smooth user experience. Focused on enhancing code analysis accuracy and improving user interaction through intuitive UI design.

StockEase – A Lightweight Inventory Management Solution for Small Businesses

StockEase is a web-based inventory management system developed to help small businesses effectively monitor their stock levels, sales, and restocking activities. It enables users to add, update, and manage product details, track stock in/out operations, generate transaction records, and receive low-stock alerts through a simple and user-friendly interface.

Volunteer Work:

Code Cipher Volunteer (Techeon 2K25)

CBIT 2025

Assisted in organizing and managing the Code Cipher coding competition at Techeon 2025. Supported participants, coordinated event logistics, and ensured smooth execution of the competition.

Student Placement Coordinator

CBIT 2025-2026

Coordinated campus recruitment activities, acting as a bridge between students and recruiters. Organized placement drives, managed student data, and ensured smooth communication and event execution.

Skills:

- C++
- Java
- Python
- Sql
- HTML & CSS
- Java Script

Course Work:

- Data Structure and Algorithms
- Data Base Management System
- Object Oriented Programming
